The diagram illustrates a multi-processor system with two processors, each with its own cache and main memory, connected to a common bus. Processor 1 (left) has a cache containing K1 and K2, and a main memory containing K3. Processor 2 (right) has a cache containing K3 and a main memory containing K4. The bus connects the two processors, allowing for data exchange. The diagram shows that K3 is shared between the two processors' main memories.

The diagram illustrates a binary tree structure with 8 leaf nodes (M1-M8) and 7 internal nodes labeled 'BYE'. The nodes are arranged in a hierarchical manner, with M1 and M2 merging into M5, M3 and M4 merging into M6, and so on, until all nodes merge into a single root.
